

Instructions for use - Please read carefully!

Majola[®] - H5-Creme

For the hygienic care of hands

Composition

Aqua, Glyceryl Stearate, Glycerin, Isopropyl Palmitate, Decyl Oleate, Alcohol Denat., Octyldodecanol, Ceteareth-12, Cetyl Alcohol, Parfum, Sorbic Acid, Potassium Hydroxide, Tocopheryl Acetate.

Properties

- **Majola[®] H5 Creme** is a biologically acidic emulsion containing fatty alcohols and easily absorbable natural fatty substances.
- When used regularly **Majola[®] -H5 Creme** eliminates the irritation of the skin caused by swelling, degreasing and irritations caused by the dryness of the skin due to the frequent use of soaps, synthetic washing substances, detergents, disinfectants, washing up liquids and washing powders and regenerates the skin quickly by restoring its acidic properties.
- **Majola[®] -H5 Creme** strengthens the natural skin bacteria thus crowding out non-resident germs.
- **Majola[®] -H5 Creme** sinks into the skin very quickly; consequently the hands leave no greasy film on the objects touched.
- **Majola[®] -H5 Creme** protects the skin when wearing gloves.

Range of application

- For the daily care of the skin, especially dry and chapped skin.
- For overall care of the hands of surgeons, surgical staff, nurses and nursing staff.
- Skin care during and after treatment of eczema or allergic irritations.
- To support prevention of professional dermatitis (The Trade Cooperative Association of Employers, Germany, prescribes that skin cremes have to be put at disposal of the employees [see German Regulations (BGW-Instructions BGR 250 / TRBA 250 article 4.1.1.1)].

Mode of application

Apply a thin layer of **Majola[®] -H5 Creme** after washing or bathing and rub in well. The product does not leave any greasy film on the skin.
